

REGAL RONDEL BRACELET

Ingredients

*size 11 seed beads in main color **s***
*4x6mm rondels (57) **R***
Magnetic tube closure

*peanut beads in main color **P** (10g)*
You'll need: *fireline thread and 2
beading needles*

Instructions

CNW a Single row, twice, as follows:

1. Center 1s onto a wingspan of thread, w/2 needles. TIP:Pin it to the bead mat.
2. Pick up 2s 1P on each needle.
3. Pick up s-R-s on one needle and slide them JUST onto the thread. With the other needle, cross through the three beads.
4. Pick up P-2s on each needle.
5. Pick up 1P on one needle and slide it JUST onto the thread. With the other needle, cross through the P.
6. Repeat steps 2, 3, 4 and 5 for desired length.

Note: for my 6.5" wrist, I made it 16 rondels long.

After placing the 16th R (or the Xth R for your size) in step 3, follow step 4. For step 5, replace the P with an s.

Build the third row by connecting these two finished rows as follows:
Lay the 2 finished rows on the bead mat in front of you, vertically. Begin at the end nearest you and work away from yourself.

7. Center 1s on a new double-needle thread.
8. Pick up 2s on each needle.
9. Pass through the first P of the finished row on your left, with the left needle.
10. Pass through the first P of the finished row on your right, with the right needle.
11. Pick up s-R-s on one needle and slide them JUST onto the thread. With the other needle, cross through the three beads.
12. Pass through the next P of the finished row on the left with the left needle.
13. Pass through the next P of the finished row on the right with the right needle.
14. Pick up 2s on each needle.
15. Pick up P on one needle and slide it JUST onto the thread. With the other needle, cross through the P.
16. Repeats steps 2-9 until each rondel unit of the two opposing rows are connected.

Attach the clasp

Tip: Weave your threads in securely, making 4 half hitch knots over the space of 4-8 beads **but before cutting the** thread use this thread to attach the clasp.

Exiting one of the two P at an end, sew through one of the two loops of the closure. Repeat for the other P at this end. When all the threads at this end are securely woven in, cut them close and carefully.

REGAL RONDEL BRACELET

At the other end of the bracelet, attach the tubular magnetic closure in the same way.

Tip: make certain the second half of the magnetic closure is in the correct direction before securing it.

Thank you for beading this new project with me today. I appreciate it and love beading with you. Love, Carol

Below is a cartoon of the first row. Repeat it to make the "third" row (a single row just like the first).

When the two strands are within 1/2 inch of each other, lengthwise, connect them following the same process **EXCEPT: instead of picking up the peanut beads, represented as red below, pass through the P beads already present in the previous rows you are connecting.**
